

Open Accounting Suite
**THE SUCCESS OF YOUR
COMPANY LIES IN A SINGLE
APPLICATION!**

COMPETITIVE ADVANTAGES

Open Accounting provides you with these competitive advantages:

ADVANTAGE 1

Full accounting management for every aspect of your business activity

ADVANTAGE 2

Detailed monitoring & updating for every financial transaction & invoicing at your company

ADVANTAGE 3

Minimal data entry forms (all-in-one), with simultaneous update & interconnection between modules

ADVANTAGE 4

Meeting your company's business needs, through the Open Accounting modules

THE DETAILS MAKE THE DIFFERENCE!

By selecting and using Open Accounting, you discover a whole world of unique management which you can now take advantage of, thanks to Open System Solutions, in order to enhance your company's profitability and development.

The Open Accounting system's points of excellence are important & they deserve your attention:

MANAGEMENT

Simple, easy to use & minimal data entry screens

NOTIFICATION

Direct notification & monitoring of the warehouse business, interconnection with accounting and financial transactions & interrelation of documents with electronic/physical receipts

MONITORING

Single monitoring & operation of companies, regardless of the bookkeeping method & accounting books category (B' & C' categories, Law 89). Monitoring according to Greek Accounting Plans (ELS), Greek Accounting Standards (ELP) & Accounting Standards (LP)

INFORMATION / UPDATE

Updated profitability information, both for the simple user in terms of invoices, as well as the management in terms of cost centres, cash flows and profit & loss

INTERCONNECTION

Connection with the external systems EDI, Banking - Platform, e-payment, BI-TARGET

EXPANSION

You achieve a steady rate of operation, development and expansion for your company

*Requires a support contract

DISCOVER THE REAL POWER OF OPEN ACCOUNTING & STAND OUT!

Obtain the most complete organization and management system for your company!

Open Accounting is the main, complete platform for all **Open System Solutions** applications; at the same time it works as the principally autonomous system for your company's organization, information and management issues.

The thing that really differentiates the **Open Accounting system** by **Open System Solutions** from any other system in competition, in addition to the software's inherent power & quality of structure and operation, is the unique modules it consists in.

Thanks to the categorization and specialization characterizing the actual different business activities, this management platform has the possibility not only to ensure the uninterrupted, perfect and very quick integration of tasks in a direct, stable and reliable way, but also to constantly update & adjust the system parameters according to your company's actual needs & possibilities.

Regardless of your company's philosophy & business scope, Open Accounting guarantees that you get exactly what you need, always tailored to your needs!

THE OPEN ACCOUNTING SUBSYSTEMS, FOR ALL COMPANY TYPES & SIZES, ARE:

FINANCIAL

The module provides complete financial information on receivable and payable accounts, integrating Aging payment orders, e-payments, etc.

ACCOUNTING & FINANCIAL INFORMATION

Analytical accounting and corporate information, by monitoring accounts per cost centre, exit section, exploitation post. Ideal for food & ferry companies, with the Cash Flow and Profit & Loss possibilities.

COMMERCIAL MANAGEMENT

In this category, the time-consuming processes of manual data entry are eliminated, through the very fast management of purchases-sales, deliveries and orders, while multiple storerooms, suppliers credit control, as well as creating reorder proposals, are supported.

SERVICES

Monitoring calls for equipment repair, external co-workers, machinery guarantees, spare parts. Creation of a repair card immediately upon delivery. Meeting the needs for white appliances, construction machinery, trucks.

OFFERS

Management of offers to clients through multiple suppliers lists and by creating the necessary documents and electronic offers.

RELATIONS BETWEEN CUSTOMERS CRMS

Managing communication with the transactors and, at the same time, monitoring corporate processes. Possibility to record the time duration for each process in the employment module.

MAINTENANCE · SUPPORT CONTRACTS

Management of maintenance & support contracts and, at the same time, issuance of invoices, according to the specified frequency.

MATERIAL SUPPLIES INQUIRIES

Management of material supplies inquiries, price comparison and purchase proposals. Work flow system for approvals. Network platform for inquiries entry.

VISIT WWW.OPENACCOUNTING.GR NOW

Learn more about the possibilities the intensive retail management system Open Accounting by OSS has to offer!

PRODUCTION

Multiple possibilities, such as: registering manufactured products, creating consumptions based on recipe lists, monitoring machinery operation times and equipment service for industrial production. Creating production and consumption based on sales, invoicing manufactured products for restaurant-pastry activities.

FERRY COMPANIES

Interaction of the corporate booking-settlement systems Forth Crs, Symbol. Improving agencies/commissions control, on-line connection with banks and automatic systems update for electronic payments. Issuance of supply invoices (auto-invoicing). Material supplies inquiries, budget-report for annual ship repairs.

AIR / ROAD / MARITIME / CARGO TRANSPORT

Issuance of air, road and maritime bills of lading. Issuance of cargo manifest and vouchers. Invoicing and costing for cases

& folders. Cargo management and monitoring software (for cars & General Cargo). Invoicing cargoes, costing in terms of voyage - day - ship.

SPORTS & WELL-BEING CENTRES

The Open Fitness module meets the needs of polyvalent centres & well-being centres. In combination with the accounting provided by Open Accounting, our company provides an All in One solution, from start to finish, for the specific activity.

INTENSIVE RETAIL

We are the only Greek company that has and provides an All in One solution, for food companies, pastry shops, bakeries and restaurants, which do business in intensive retail. Cashier sales are covered by Open POS, shop management by Open Retail, and overall management by Open Accounting.

The Open Accounting and Open Retail Suite applications won an award in the competition "Self-Service Excellence Awards 2012" in the category "Innovation & New Technology"; they also received a distinction in the "Impact Business IT Excellence AWARDS 2017" as "the most effective solution for intensive retail businesses".
